

Dr. Stefano **GORI**

# International Master program in Implant Dentistry

**5 modules  
from August 2026 to April 2027**

FLORENCE, Italy

*English language*

# International Master program in Implant Dentistry

The International Master in implant dentistry is a program consisting in 4 mono-thematic modules plus an optional Basic module of four days and half each, with every module focusing in-depth on a single fundamental topic of implant dentistry.

By attending the complete five modules (22 days and half), participants will learn how to thoroughly master all aspects of implant dentistry; all the Modules offer theoretical sessions, hands-on training on animal and artificial models by the course participants and live demonstrations performed by Dr. Gori on a patient.

The 5 modules were scheduled with an approximate one-month interval, thus allowing participants to learn a structured method and to put into practice the concepts presented before delving into a new topic, without losing the program's necessary continuity. Participants will also be able to appreciate beautiful Florence, the cradle of the Renaissance, in Spring, surrounded by blossoming nature, and in Winter, enjoying the Christmas atmosphere. At the end of the Master program the participants will receive a well-deserved certificate of proficiency in implant dentistry.

## WHAT YOU WILL LEARN

The International Master program in implant surgery is a course dedicated to all those dentists wishing to improve their skills and gather deeper knowledge in the following 5 topics:

- The foundation of modern implant dentistry (basic optional module)
- Post-extraction implant placement in the anterior and posterior area;
- Hard and soft tissue augmentation around dental implants;
- Maxillary sinus floor elevation - crestal and lateral approach;
- Computer-guided implant placement and immediate loading (total and partially edentulous cases - post-extraction cases).

Ample space is dedicated to hands-on sessions by the course participants on models and to interactive live surgeries performed by the speaker and analyzed in detail before, during and after every clinical phase.

## Registration fee

**4 modules**

**€10.900,00** + 22% VAT

single registration

**€9.900,00** + 22% VAT

combined registration  
(2 or more participants together)

**Basic module (optional)**

**€2.700,00** + 22% VAT

single registration

**Basic module (optional)**

**€2.500,00** + 22% VAT

combined registration  
(2 or more participants together)

## course package includes

full day courses

theoretical sessions

hands-on sessions on animal and artificial models

live demonstration on a patient by the speakers

personal interaction with the lecturer

2 coffee breaks per day

4 lunches per module

1 final gala dinner

After each module, participants will be provided with PDF slides of the theoretical sessions, as well as videos of the live surgeries performed.

## THE FACILITY

**ECAD Institute**

Via di Scandicci 116  
50143 Firenze (FI)

# International Master in Implant Dentistry

## Calendar & Program index of the 5 modules

**THE OPTIONAL BASIC MODULE** 26-30 August 2026 pag 5

The foundation of modern Implant dentistry

**MODULE 1** 28 October - 1 November 2026 page 6

Post-extraction implant placement in the anterior and posterior area

**MODULE 2** 16-20 December, 2026 page 7

Hard and soft tissue augmentation around dental implants

**MODULE 3** 17-21 February, 2027 page 8

Maxillary sinus floor elevation - crestal and lateral approach

**MODULE 4** 14-18 April, 2027 page 9

Computer-guided implant placement and immediate loading

# The speaker

## Dr. Stefano Gori

Dr Stefano Gori graduated in Medicine and Surgery with full marks and honours from the University of Florence. He trained and perfected himself as a dentist by attending a long series of courses held by qualified teachers in Italy and abroad.

Speaker, in the field of implant dentistry, in national and international courses and conferences and lecturer in the context of 2nd-level Master's organized by the University of Padua, the Catholic University of the Sacred Heart of Rome and the Unicamillus University of Rome.

On behalf of the prestigious European Association of Osseointegration (EAO), he held, together with Dr Fradeani, a Master Clinician Course entitled "Aesthetic challenges in implant dentistry. Surgical and prosthetic approach in the anterior area".

He participated in the drafting and revision of both volumes of Dr Mauro Fradeani's book "Aesthetic rehabilitation in fixed prostheses" (published in 12 languages).

He deals exclusively with oral surgery and implantology.

He carries out his professional activity in his studio in Florence and Pesaro at the clinic of Dr Fradeani, with whom he has been collaborating for over 25 years.

# Optional **BASIC** MODULE: the foundation of modern implant dentistry

26-30 August, 2026

**Dr. Stefano GORI**

	Wednesday	Thursday	Friday	Saturday
9 - 11	Theoretical session	Theoretical session	Theoretical session	Hands-on session
11 - 11.15	Coffee break	Coffee break	Coffee break	Coffee break
11.15 - 13.30	Theoretical session	Theoretical session	Theoretical session	Hands-on session
13.30 - 14.30	Light lunch	Light lunch	Light lunch	Light lunch
14.30 - 17.00	Theoretical session	Live surgery	Hands-on session	Theoretical session
17.00 - 17.15	Coffee break	Coffee break	Coffee break	Coffee break
17.15 - 18.30	Theoretical session	Live surgery	Hands-on session	Theoretical session

Theoretical part
  Live surgery
  Hands-on session

**SUNDAY 9-13 Theoretical session**

## Theoretical program

- Selection of the implant patient: systemic risk factors (real or supposed)
- Surgical anatomy: anatomic structures at risk of injury
- Clinical analysis of the implant site: thickness, height and mesiodistal width of the edentulous area. Extension and quality of the keratinized tissue. Inter-occlusal space and local inter-arch relationships.
- Three-dimensionally correct implant positioning: mesiodistal position, tooth-implant distance and inter-implant distance at crestal and occlusal level. Buccolingual position. The inclination of the implant axis.
- Preparation of surgical guides for prosthetically guided implant placement, performed using traditional freehand techniques
- Radiographic analysis of the implant site: pre-visualization of the implant positioning through software for guided surgery
- Fundamental concepts of biomechanics
- Factors correlated to peri-implant crestal bone stability
- Deferred implant insertion: design, incision and elevation of the flap. Step-by-step implant site preparation technique. Determination and verification of the "starting point". Checking and rectifying the initial path of the implant site. Differentiated preparation of the site according to the different bone quality. Various types of flap sutures.
- Second surgical phase: aims and requirements of the ideal technique. Flap-less and flapped procedures. Healing by second and first intention of the interproximal space. Pedicle rotation technique. Epithelial connective "inlay" technique. Mesial flap sliding technique.
- Peri-implant diseases: risk factors, prevention, treatment

# MODULE I: Post-extraction implant placement in the anterior and posterior area

28-31 October, 2026

Dr. Stefano GORI

	Wednesday	Thursday	Friday	Saturday
9 - 11	Immediate post-extraction implant placement in the anterior area	Post-extraction implant placement in the anterior area: hands-on session	Post-extraction implant placement in the premolar area: live surgery and temporary restoration	Post-extraction implant placement in the molar area: live surgery and customized abutment
11 - 11.15	Coffee break	Coffee break	Coffee break	Coffee break
11.15 - 13.30	Immediate post-extraction implant placement in the anterior area	Post-extraction implant placement in the anterior area: hands-on session	Post-extraction implant placement in the premolar area: live surgery and temporary restoration	Post-extraction implant placement in the molar area: live surgery and customized abutment
13.30 - 14.30	Light lunch	Light lunch	Light lunch	Light lunch
14.30 - 17.00	Post-extraction implant placement in the anterior area: live surgery and temporary restoration	Immediate post-extraction implant placement in the premolar area	Immediate post-extraction implant placement in the molar area	Post-extraction implant placement in the premolar and molar area: hands-on session
17.00 - 17.15	Coffee break	Coffee break	Coffee break	Coffee break
17.15 - 18.30	Post-extraction implant placement in the anterior area: live surgery and temporary restoration	Immediate post-extraction implant placement in the molar area	Immediate post-extraction implant placement in the molar area	Post-extraction implant placement in the premolar and molar area: hands-on session

Theoretical part
  Live surgery
  Hands-on session

**SUNDAY 9-13 Theoretical session**

## Theoretical program

- Phases of the healing process of the post-extraction alveolar socket
- Dimensional collapse of the post-extraction socket: horizontal and vertical reduction
- Compensation of the volumetric collapse of the post-extraction socket:
  - » Graft materials: are they indispensable? Which ones work best?
  - » Connective tissue graft: when and why is it necessary?
- Timing of implant positioning in relation to tooth extraction. Hammerle classification
- Advantages and disadvantages of the various types of timing
- Esthetic area: what is the best approach? Real contraindication of the post-extraction method
- Clinical and 3-dimensional radiographic evaluation of the implant site: key parameters
- The crucial importance of the Kan classification (sagittal root position)
- Immediate post-extraction implant placement in the anterior area: surgical and prosthetic protocol
- Immediate post-extraction implant placement in the anterior area: the management of the compromised alveolar sockets
- Immediate post-extraction implant placement in the premolar area: the management of the more at-risk alveolar sockets
- Immediate post-extraction implant placement in the molar area:
  - » Achievement of the prosthetically correct implant position
  - » How to treat the inter-radicular septum
  - » Use of the titanium intermediate abutment
  - » Stabilization of the graft material
  - » Role of the customized healing abutment
  - » Management of the compromised molar alveolar sockets
  - » Timing of the final prosthetic loading

# MODULE II: Hard and Soft tissue augmentation around dental implants

16-19 December, 2026

Dr. Stefano GORI

Wednesday

Thursday

Friday

Saturday

9 - 11	Guided Bone Regeneration	Guided Bone Regeneration	Guided Bone Regeneration with resorbable and non-resorbable membrane	Soft tissue augmentation
11 - 11.15	Coffee break	Coffee break	Coffee break	Coffee break
11.15 - 13.30	Guided Bone Regeneration	Guided Bone Regeneration	Guided Bone Regeneration with resorbable and non-resorbable membrane	Soft tissue augmentation
13.30 - 14.30	Light lunch	Light lunch	Light lunch	Light lunch
14.30 - 17.00	Guided Bone Regeneration with resorbable membrane: live surgery	Guided Bone Regeneration with non-resorbable membrane: live surgery	Guided Bone Regeneration with resorbable and non-resorbable membrane	Soft tissue augmentation
17.00 - 17.15	Coffee break	Coffee break	Coffee break	Coffee break
17.15 - 18.30	Guided Bone Regeneration	Guided Bone Regeneration	Soft tissue augmentation	Soft tissue augmentation

 Theoretical part    Live surgery    Hands-on session

**SUNDAY 9-13 Theoretical session**

## Theoretical program

- Biological principles at the base of guided bone regeneration
- Resorbable membranes: types, indications, advantages and disadvantages
- Non-resorbable membranes: indications, advantages and disadvantages
- Traditional membranes in e-PTFE and the latest generation membranes in d-PTFE
- Use of perforated d-PTFE membrane (d-PTFE mesh)
- Indications and use of titanium mesh: chairside titanium mesh and customized CAD/CAM titanium mesh
- Requirements and types of grafting materials (autograft, allograft, heterograft, alloplast)
- GBR in horizontal bone defects: different approaches in the anterior and posterior areas
- GBR in vertical bone defects
- GBR and implant insertion: one-stage and two-stage approach
- Pre- and post-surgical therapy
- Step-by-step execution technique using different types of barrier membranes:
  - » Soft tissue management: design, incision, elevation, passivation and suturing of the flaps
  - » Membrane management:
    - » Stabilization techniques: titanium pins vs screws.
- Post-operative complications: prevention and treatment
- Long-term results of guided bone regeneration
- Muco-gingival evaluation of the implant site
- Preservation of peri-implant keratinized tissue
- Increasing peri-implant keratinized tissue:
  - » Free gingival graft
  - » Strip gingival graft
- Connective tissue grafts:
  - » Increasing the biological width
  - » Improving the aesthetics
- Coronally advanced flap in implant dentistry

# MODULE III: Maxillary Sinus Floor Elevation - Crestal and Lateral approach

17-20 February, 2027

Dr. Stefano GORI

	Wednesday	Thursday	Friday	Saturday
9 - 11	Maxillary Sinus Floor and nasal cavity anatomy and phisyo-pathology	Maxillary Sinus Floor Elevation - Crestal approach: live surgery	Maxillary Sinus Floor Elevation: Lateral approach	Maxillary Sinus Floor Elevation - Lateral approach: live surgery
11 - 11.15	Coffee break	Coffee break	Coffee break	Coffee break
11.15 - 13.30	Maxillary Sinus Floor Elevation: Crestal approach	Maxillary Sinus Floor Elevation - Crestal approach: live surgery	Maxillary Sinus Floor Elevation: Lateral approach	Maxillary Sinus Floor Elevation - Lateral approach: live surgery
13.30 - 14.30	Light lunch	Light lunch	Light lunch	Light lunch
14.30 - 17.00	Maxillary Sinus Floor Elevation: Crestal approach	Maxillary Sinus Floor Elevation: Lateral approach	Maxillary Sinus Floor Elevation - Lateral approach: live surgery	Maxillary Sinus Floor Elevation - Lateral approach: Hands-on session
17.00 - 17.15	Coffee break	Coffee break	Coffee break	Coffee break
17.15 - 18.30	Maxillary Sinus Floor Elevation: Crestal approach	Maxillary Sinus Floor Elevation: Lateral approach	Maxillary Sinus Floor Elevation - Lateral approach: live surgery	Maxillary Sinus Floor Elevation - Lateral approach: Hands-on session

Theoretical part
  Live surgery
  Hands-on session

**SUNDAY 9-13 Theoretical session**

## Theoretical program

- Anatomy and physio-pathology of the maxillary sinus and nasal cavities.
- Crestal approach:
  - » Indications and contraindications.
  - » Pre and post-surgical therapy.
  - » Execution techniques: -controlled fracture Vs erosion of the maxillary sinus floor.
  - » Grafting materials: are they really necessary?
  - » Post-operative complications: prevention and treatment.
- Lateral approach:
  - » Correct evaluation of "anatomical traps":
    - » Underwood septa
    - » Alveolus-antral artery
    - » Infra-orbital nerve
  - » Pre-surgical diagnostic evaluation: intraoral radiographs, OPT, MSCT, CBCT
  - » Pre-surgical control of 10 critical factors related to the conditions of the maxillary sinus.
  - » General and local indications and contraindications.
  - » Pre and post-surgical therapy.
  - » Execution techniques: tradition vs innovation.
  - » Autogenous bone: gold standard among grafting materials? What are the alternatives?
  - » Timing of implants insertion and implants discovery in relation to sinus elevation.
- Intra-operative and post-operative complications: how to manage them.

# MODULE IV: Computer-Guided Implant Placement and Immediate Loading

14-17 April, 2027

Dr. Stefano GORI

	Wednesday	Thursday	Friday	Saturday
9 - 11	Total edentulism: Computer-guided vs free-hand Implant placement	Partial edentulism: Traditional Computer-guided approach	Post-extraction Implant placement: Computer-guided approach	Post-extraction implant placement - Computer-guided approach: Live surgery and Immediate loading
11 - 11.15	Coffee break	Coffee break	Coffee break	Coffee break
11.15 - 13.30	Total edentulism: Computer-guided vs free-hand Implant placement	Partial edentulism: Smart fusion approach	Post-extraction Implant placement: Computer-guided approach	Post-extraction implant placement - Computer-guided approach: Live surgery and Immediate loading
13.30 - 14.30	Light lunch	Light lunch	Light lunch	Lunch break
14.30 - 17.00	Total edentulism: Computer-guided Implant placement: Live surgery and Immediate loading	Partial edentulism - Smart fusion approach: Live surgery and Immediate loading	Computer-guided planning: Hands-on session	Post-extraction implant placement - Computer-guided approach: Live surgery and Immediate loading
17.00 - 17.15	Coffee break	Coffee break	Coffee break	Coffee break
17.15 - 18.30	Total edentulism: Computer-guided Implant placement: Live surgery and Immediate loading	Partial edentulism - Smart fusion approach: Live surgery and Immediate loading	Computer-guided planning: Hands-on session	Post-extraction implant placement - Computer-guided approach: Live surgery and Immediate loading

Theoretical part
  Live surgery
  Hands-on session

**SUNDAY 9-13 Theoretical session**

## Theoretical program

- Different types of digital approaches in implant dentistry
- Surgical and prosthetic advantages of guided surgery compared to the “freehand surgery”.
- The traditional double-scan protocol in total and partial edentulism
- Preparation of the radiographic guide
- The Smart fusion technique to manage the edentulous area in partial edentulism
- The Smart fusion technique to manage the post-extraction sites in partial edentulism
- Two-piece templates versus one-piece templates
- Pilot drill templates: : indications, advantages and disadvantages
- Fully guided templates
- Fully guided templates with vertical offset implant position to avoid soft and hard tissue interferences
- Surgical elimination of soft and hard tissue interferences with the surgical guide
- Double template technique: limits, advantages and disadvantages
- Protocols related to the insertion of immediate post-extractive implants by guided surgery
- Protocols related to the insertion of immediate post-extractive implants by guided surgery
- Development of master cast model from the surgical guide
- Immediate loading in full-arch cases: the traditional reinforced temporary restoration
- Early loading in full-arch cases: the long-term temporary restoration
- Analysis and discussion of complex clinical cases

“

“Stefano, I just wanted to say a massive thank you for everything you have taught me. You are an incredible clinician and more importantly an incredible person. I don't think you realise how much of an impact you have had on my life and my career and as much as it is emotional to say goodbye, your teachings will always stay with me for the rest of my career. Thank you from the bottom of my heart.”

Junaid Malik (London, UK)

“Hi Stefano. I just wanted to say a huge huge thank you. I could not have chosen a better teacher to begin my implant journey with. The truth is the way you showed your love and passion for your work everyday inspired me to do the same and keep aiming to be better day by day. I hope to make you proud and soon you will see my first case and I hope to share with you in the near future. Grazziii Dr Stefano”

Karim Akram (London, UK)

“Dear Stefano, thank you again, first of all, for your sincere, dedicated and professional knowledge. Thank you for your commitment, which was visible at every step. During this training I learned a lot and recalled a lot. I believe that even after so many years of work, it is advisable to refresh your knowledge. Thank you again. I would also like to congratulate you on such a nice and professional training place. On my behalf, please thank the entire team without whom it would probably be difficult to prepare it. Thank you again and see you soon!”

Kamil Abed (Warsaw)

“Dear Stefano, as Mauro Fradeani was my prosthodontist father, you're for sure my implantologist father. But more than anything, I think you are a role model for how to behave with patients, how to behave with colleagues, and how to be a good person. So thank you for that!”

Haris Sabic (Zagreb)

“I had the best teacher. Thank you for everything, Stefano.”

Paul Bold (Timisoara)

“Thank you so much, Stefano, for your advice, expertise, and guidance. I am exceptionally grateful for the opportunity to learn from you. Watching the live surgery, receiving your assistance during the hands-on practical sessions, and attending your excellent presentations made this an immersive learning experience in a well-equipped setting. You have set a high standard for me and my colleagues to follow.”

Nikul Patel (Alton, Hampshire)

”
